

**Amendments to Specification**

Page 1, delete the TITLE in its entirety and replace therewith the following:

**NEMATIC LIQUID CRYSTAL DISPLAY DEVICE WITH MULTI-DOMAIN PIXELS**

Page 1, before line 1 insert the following:

This application is a continuation of co-pending U.S. application serial number 09/342,776, filed June 29, 1999 (now allowed), the teachings of which are incorporated herein by reference in its entirety.

Pages 194-196, delete the ABSTRACT in its entirety and replace therewith the following:

Featured is a liquid crystal display device including first and second transparent substrates and a liquid crystal layer interposed there between that includes a plurality of domains in each pixel region. Also included are first and second polarizing plates and first and second phase compensators; the first compensator is provided between the first polarizing plate and first substrate and the second compensator is between the second polarizing plate and second substrate. The phase-delay axes for the first and second compensators are parallel to each other and substantially perpendicular to a phase-delay axis of the liquid crystal layer. A third phase difference compensator is provided between the first and/ or second polarizing plate and the corresponding first or second compensator.
